

UTSN Bulldozer Tires

The UTECH UTSN is loader and grader tire pattern that is engineered with exceptional traction for applications on snowy, icy or slippery terrain. The exclusive winter compound and special zigzag tread pattern offer great skid resistance and maximum maneuverability in winter conditions.

Parts Details Of UTSN Bulldozer Tires

Exceptional traction on snowy and icy road surfaces

- The aggressive zigzag tread design with separate blocks features excellent self-cleaning properties. And along with the special winter compounds, it delivers exceptional traction and maneuverability on snow and ice.

Improved impact resistance and retread-ability ensured by high quality architecture:

- The all-steel casing design and improved belt design offer increased load capacity and puncture resistance.
