

## **UTC1 Crane Tires**

The UTECH UTC1 is specially designed for mobile cranes that have special requirement for traction and stability in both highway and off-highway applications. And it also features extra long wear life and high-speed durability.

### **Parts Details Of UTC1 Crane Tires**

#### **Exceptional durability in extreme usage**

- Reinforced casing for exceptional durability in extreme usage. And the casing is optimized with even contact distribution that prevents uneven wearing.

#### **Improved traction and stability.**

- AThe non-directional offset E2 pattern offers improved traction and stability.

## Improve the high speed capability in long-distance traveling

- Low heat generation compound is used to improve the high speed capability in long-distance traveling.

## Specifications of UTC1 Crane Tires

| Size                    | Star Rating | TRA Code | Rim Width<br>&Flange | Overall Width |     | Overall Diamete |      | Tread Depth |    | Load Index &<br>Speed Symbol | Type |
